

COTTON FROM STOCK HERE FOR EUROPE?

Buying Follows Rumors That
Liverpool Will Take
Large Blocks.

SENTIMENT IS BEARISH

Outlook Is for Good Weather.
While Planting Has Pro-
gressed Rapidly.

Prices of cotton were steady through most of the session yesterday, with a little strength shown at three o'clock. The market was closed by the London cotton exchange, but the latter appeared to be more or less quiet, as far as prices were concerned.

Advances in corn fell short of those registered in wheat, the closing level being about 1½ above the previous day's. Weather reports were favorable, and the cash demand is said to continue light.

Moreover, liquidation by the large holders was still said to be in progress at leading market. Oats were a little higher, while corn, wheat. Cash markets were reported lower, the demand showing little improvement.

Among the export business reported yesterday were 12½ loads of No. Northern Duluth at exports. Seeding operations in the Northwest are making favorable progress and the growing crop still maintains its optimistic promise. The director of the Ohio State Experiment Station reported the statement recently referred to that in view of the effect that excess wheat crop had been almost entirely ruined by the floods.

A Duluth despatch reported that seed in southern Minnesota was half com-

pleted and under way in northern Min-

nesota and North Dakota. B. W. Snow

has been advised of the presence of the insect fly in eastern and northeastern

southern Indiana and Illinois, but there are

no evidences to indicate either an im-

portant situation so far as this pest is

concerned. The Broomhall International

Review stated that European crop condi-

tions show no improvement. In France

and Germany the condition is not high

and the Balkan outlook is unfavorable.

Prices at Chicago were:

	Open	High	Low	Clos.	Prev.
Wheat	60½	61	60	60½	60
May	60½	61	60	60½	60
